

TropiCool
WATER CHILLER

EFFECTIVE and
reliable **COOLING** for
your pool

TropiCool[®]

COOL YOUR POOL RELIABLY

The TropiCool® Water Chiller is designed to lower the temperature of your swimming pool to a refreshing and enjoyable experience throughout the summer. A heat pump gives you consistent performance, while evaporative cooling systems struggle to keep up in humid climates.

- Set your desired temperature to maintain
- Helps conserve water, does not work on evaporation
- Consistent performance regardless of humidity
- Titanium heat exchanger impervious to harsh water chemistry
- TC1500 features the world's ONLY integrated AquaTop which ensures optimal air flow for maximum efficiency and prevents debris from getting inside the heat pump
- Ability to chill as low as 7.2°C/45°F for cold plunge pools
- TC500 for cold plunge up to 7,500 L/2,000 gallons;
TC1000 for cold plunge up to 11,300 L/3,000 gallons;
TC1500 for cold plunge up to 15,000 L/4,000 gallons
- Operating cost for TC500 is 50¢ per hour,
TC1000 & TC1500 are 75¢ per hour (Based on 12¢ per kWh)
